III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The question whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been and will not be examined in respect of:

2. A meaningful international preliminary examination cannot be carried out due to the failure of the nucleotide and/or amino acid sequence listing to comply with the standard provided for in Annex C of the Administrative Instructions:

PCT/US02/12136

## V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. STATEMENT

Novelty (N)	Claims <u>3,5,8-11,14-17</u>	YES
	Claims <u>1-2,4,6-7,12-13</u>	NO
Inventive Step (IS)	Claims <u>5,8-11,14-17</u>	YES
	Claims <u>1-4,6-7,12-13</u>	NO
Industrial Applicability (IA)	Claims <u>1-17</u>	YES
	Claims <u>NONE</u>	NO

### 2. CITATIONS AND EXPLANATIONS

Claims 1-2, 4, 7, 12, and 13 lack novelty under PCT Article 33(2) as being anticipated by Taheri (U.S. 5,843,169). Taheri discloses an apparatus for securing a vascular graft within a vessel comprising: a shaft, an expansion member and a fastener array (Fig. 1a).

Claims 1-2 and 6 lack novelty under PCT Article 33(2) as being anticipated by Dakov (U.S. 5,720,755). Dakov discloses an apparatus for securing a vascular graft within a vessel comprising: a shaft, an expansion member, a plurality of fasteners that define a substantially annular arrangement (Fig. 10B).

Claim 3 lacks an inventive step under PCT Article 33(3) as being obvious over Taheri as above in view of Blomme (WO 99/55254). Taheri discloses an apparatus for securing a vascular graft within a vessel using fasteners, however Taheri fails to disclose the fasteners operatively connected to each other. Blomme teaches fasteners in an array that are operatively connected to each other. It would be obvious to one of ordinary skill in the art to combine fasteners in an array that are operatively connected to each other as per Blomme to the apparatus of Taheri to permit easier loading of the fasteners.

Claims 5, 8-11, and 14-17 meet the criteria set out in PCT Article 33(2)-(4), because the prior art does not teach or fairly suggest an apparatus for fastening a graft within a vessel comprising: fasteners releasably adhered with an adhesive to the periphery of the expansion device.
